

ETP-HYLOC®

For heavy loads
and quick mounting

Hydraulic pumps

Our pumps are designed for easy usage at the pressures and volumes that are needed for ETP-HYLOC.

All pumps are of a robust design and CE marked. The motor pump is especially designed for use with

larger sizes of ETP-HYLOC, size < 150 mm, or when mounting/dismantling is to be made frequently.

All pumps are equipped with manometer and hoses (length 3 m). Max. working pressure is 1 500 bar.

Hand pump H-11

Delivered in a practical steel box.

- ETP Part number: 19102
- For use with ETP-HYLOC
 - Delivered in steel box
 - 2 pressure hoses + 1 return hose (3m)
 - Incl. 2 L SAE 80 W oil
 - Incl. 3 pcs. Quick connection C-02.

Motor pump A-04

Pneumatically driven. Delivered in a practical steel box.

- ETP Part number: 19112
- For use with ETP-HYLOC.
 - Delivered in steel box
 - 2 pressure hoses + 1 return hose (3m)
 - Incl. 2 L SAE 80 W oil
 - Incl. 3 pcs. Quick connections C-02.

SPARE PARTS PUMPS

High pressure hose

ETP Part number: K0061

- For ETP Handpump H-11 and Motorpump A-04
- Length 3 m.

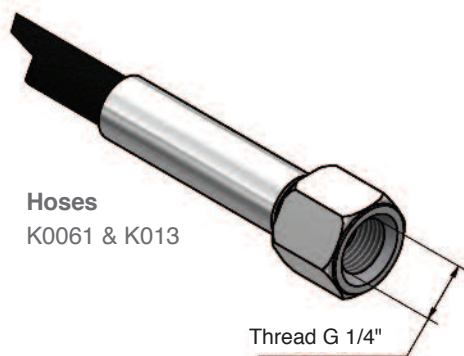

Return hose

ETP Part number: K013

- For ETP Handpump H-11 and Motorpump A-04
- Length 3 m.

QUICK CONNECTION

Quick connection C-02

For a fast and secure mounting procedure our pumps are equipped, as standard, with high pressure quick connections.

Each ETP-HYLOC is delivered with the corresponding nipple (N-02).

Quick connection C-02

ETP Part number: 19131

The quick connection, C-02, is screwed onto the nipple, N-02, with an outer ring.
